

Lean Problem Solving

6-8 HOURS VIRTUAL AND ON-SITE (Problem Solving Content delivery)

6-8 HOURS ON-SITE (Problem Solving Work Area Implementation)

OVERVIEW

Achieving business excellence within a company comes from optimizing a work environment to deliver desired goods and services. Lean Problem Solving is a way of approaching organizational problems that is characterized by continuous improvement and the use of proven, problem-solving methodologies. It provides organizations with ways to: identify and solve problems in less time with of measurable results; involve team members and key stakeholders in the problem solving process; use data and process flow to focus on a problem; and create practical and detailed solutions.

Various tools and concepts will be discussed. But the greatest benefit with going to the gemba, a term meaning "the actual place." The idea of gemba is that the problems are visible, and the best improvement ideas will come from going to the gemba. The gemba walk is an activity that takes management to the front lines to look for waste and opportunities to practice gemba kaizen, or practical shop floor improvement.

PROGRAM OBJECTIVES

- Learn to "See" and identify problems in the production
