

Supplier Scouting Opportunity Synopsis 2023-035

Item to be scouted: Misc. Electrical Line Hardware

Days: 30

Item description: Items being sought are needed to repair/replace existing electrical hardware at WPA facilities. This hardware is part of the electrical grid that is designed to protect and maintain electrical flow. Hardware functions vary i.e., clamps, compression dead-ends, clevis's, and dampers. Every substation has multiple parts and these are critical to operational success. They are used on transmission lines, transformer lines, and various other parts at each substation. See Attachment #1 for list of parts, including quantities needed. Examples of parts are also attached

NAICS code: 424130
