SARGENT Manufacturing offers a wide variety of products that meet building codes requiring hurricane-resistant certification. SARGENT products are independently tested to meet the requirements of the building codes as specified by the Florida Building Code, Miami Dade Code Requirements and in the International Building Code. Listed below are certifications and the standards met by the MD8600 Series exit devices, see Hurricane-Resistant Section of this catalog for additional devices listed and certified.

UL Listed per:

- ANSI/SDI-BHMA A250.13

*Electric Latch Retraction Option (56-)***80 Series****SARGENT®**
ASSA ABLOY

SARGENT's Electric Latch Retraction exit device is the perfect choice for high traffic egress doors that require access control. This non-handed exit device rail is durable and easy to install. It utilizes a latch retraction motor rather than a solenoid, ensuring quiet operation ideal for locations such as conference rooms, theaters and libraries. Once retracted, the door functions in a push/pull manner.

The 56- exit device can be dogged for momentary ingress and egress and is commonly used in conjunction with an automatic door operator. The device can be dogged continuously on fire-rated devices that are tied into the building's fire detection system.

**56- Electric Latch Retraction Features**

- 5 year warranty
- Patent pending and/or patent www.assaabloydss.com/patents
- Field serviceable -modular design
- Motor driven latch retraction for smooth, precise operation
- Amount of rail retraction is automatically controlled by the 56-circuitry; System actively monitors its position and adjusts itself
- Digital retraction timer (0-20 seconds; factory setting is 5 seconds)
- Non-contact Request-to-Exit (55-) switch available
- Retrofit kits available - see next page
- Standard electric hinge - no special power transfer required
- Can be used for continuous and intermittent use
- UL Listed for Class II Circuitry
- Power Requirements: 24VDC regulated/filtered power supply (3500 Series)
- Current draw: .6A during retraction and .25A maintained in dogged hold position
- Requires 1A at 24VDC regulated/filtered power supply
- Available for all 80 Series exit devices (except FM8700)
- See page 75 for compatible options
- Minimum Door Widths:
 - Wide Stile Door 28"
 - Narrow Stile Door 28"
- See McKINNEY's Transfer Device Solutions Catalog for QC Hinge and cable requirements
- Order as a 56- option (e.g., 56-HK-8913F x ETMF x 32D x 36")

Note: HK- and 16- are not available for Fire Rated Doors

Note: The 56- Option is not supplied with Manual Dogging (Hex Key or Cylinder Dogging) unless specified

Optional Accessories

- 3500 Series Power Supply
- 4370 Keyswitch
- 4291/4292 Keypad
- 3287 Door Status Switch
- 881 Monitor Strike
- 4341 Push Button Switch (momentary)
- Norton Automatic Door Operator

80 Series

SARGENT
ASSA ABLOY

AL- Alarm Option

SARGENT's AL-80 Series Exit Devices are designed for areas requiring a stand-alone alarm on outward swinging doors. This device has an integrated alarm in the push rail to discourage the unauthorized use of emergency exit doors. The alarm inside the rail sounds immediately upon exit. The AL-80 Series is ideal for rear exterior doors, doors leading to a rooftop, or anywhere security is a concern.

Features

- Microprocessor based alarm board
- When armed, alarm sounds immediately upon rail depression
- All exit devices have tamper resistant latching (Guarded Latch)
- Battery powered – 9VDC
- 103 Db @ 8 ft pulsating horn
- Flashing red LED provides visible violation indication, reset by key only
- Low battery alert
- Field selectable continuous alarm option-3267 Power Supply and 546 Harness recommended
- Automatic re-arming option
- Supplied with a #41 (1-1/8") with standard off set cam
- UL Listed and cUL Listed
- UL Listed to Canadian Safety Standards
- Rail Monitoring & Guarded Latch are standard internal features
- Available with all 80 Devices, except LP, LR, LS8600, FM8700, WS & HC8800 Devices
- Minimum Door Widths:
 - Wide Stile Door : E-n/a; F-36" only; J-42"-39"; G-48"-43"
 - Narrow Stile Door: E-32" only; f-36"-34"; J-42"-37"; G-48"-43"
- See page 75 for compatible options
- See McKINNEY's Transfer Device Solutions Catalog for QC Hinge and cable requirements (if hard wired)
- Order as an AL- option (e.g., AL-8916F x ETJ x 32D x 36" Door)

545 Alarm Retrofit Kits

Alarm retrofit kits available for the following 80 Series devices - 8300, MD8600, WD8600, GL-8800, and 8900 only. (GL-8800: Rim device with guarded latch)

546 Wiring Harness

Harness allows for remote control of the alarmed exit device

- Remote Alarm Reset—reset from remote location
- External Inhibit – shunts alarm from remote location
- Remote Power – allows unit to be wired to a 9VDC power supply (3267)
- Remote Monitor – allows unit to be wired to remote console
- Order as:
 - 546 - Wiring Harness (For AL- option) - Mfg. prior to 7/1/04
 - 546-F - Wiring Harness for F-Size Rails - Mfg. after 7/1/04
 - 546-G - Wiring Harness for G-Size Rails - Mfg. after 7/1/04
 - 546-J - Wiring Harness for J-Size Rails - Mfg. after 7/1/04

55- Request-to-Exit Option

SARGENT Request-to-Exit Signal Switch option for exit devices provides push rail monitoring for a variety of applications; such as to sound an alarm, initialize a delayed egress system, or de-energize an electromagnetic lock.

Switch type SPDT form "C" contacts

- 30 VDC@2 Amp. maximum rating
- All wires run through rail
- Available with all 80 Series devices, except for FM8700
- See page 75 for compatible options
- Minimum Door Widths:
 - Wide Stile Door 24"
 - Narrow Stile Door 24"
- See McKINNEY's Transfer Device Solutions Catalog for QC Hinge and cable requirements

Electric Strike

Works with all brands of

cylindrical and mortise locksets, with or without a deadbolt

The HES 1600

Series electric strike accommodates up to a 1" deadbolt with enhanced vertical cavity spacing.

The HES 1600 Series Electric Strikes set a new standard in the industry by offering dynamic integrated adjustability and field configurable options compatible with any cylindrical or mortise lock. The modular design of the platform makes stocking and installing easier with interchangeable faceplates and accessories. For the first time, the aesthetics of an electric strike are complementary to other surrounding door hardware and blend in with the opening due to the fully finished design, available in seven finishes.

Securitron iMXDa

Delayed Egress Magnalock®

Configurable, 1,200 lbs holding force, delayed egress Magnalock

Integrated movement exit delay with all-in-one Magnalock.

Prevent losses at emergency exits with iMXDa. An attempted exit initiates an alarm and a brief delay before the lock releases, giving personnel time to respond before an exit occurs. Protect memory care wards, hospitals, dormitories, airports, child care facilities and retail or warehouse environments. Used on out-swing doors, installation requires no alteration or replacement of existing fire-rated or non-fire-rated latching hardware.

Features

Standard Features

- Automatic dual-voltage—no field adjustment required
- Bracket mounting provides the easiest install for out-swing doors
- Size optimized for use with door closers
- Patented BondSTAT lock bond sensor
- Instant release circuit—no residual magnetism
- Internal wire access chamber
- Easily visible LEDs indicate status on secure side of door
- Advanced intelligent microprocessors provide alarm options and trainable door movement detection to minimize false alarms
- Permits free egress in emergency situations
- Fully integrated delay and detection features for fast installation of delayed egress system
- Easily adjustable door movement detection from 1/8" [3.2 mm] to 1" [25.4 mm]
- External alarm relay isolated dry contact (1A at 24 VDC)
- External reset

- Configurable settings include: Nuisance alarm times – 0 to 3 seconds, Irrevocable delay times – 15 or 30 seconds, External bypass delay times – 0, 5, 10, or 15 seconds, Post alarm reminder, Bypass expiration alarm, Manual reload or delayed automatic reload (BOCA)
- Required sign included
- Ultra-secure collapsing blind nuts mount to door frame for strength and reliability
- Rust resistant - all ferrous metal surfaces plated for durability
- MagnaCare® lifetime replacement, no fault, no questions asked warranty

Optional Features

- iEXDa allows alarm initiation via an external panic device
- iMXDaCA is CAL Fire BML listed
- iMXDaCH is Chicago compliant
- iMXDaH for HUGS® Infant Protection System

Securiton M680E EcoMag

Sustainable Magnalock®

1,200 lbs holding force, bracket mounted, sustainable Magnalock

The same unsurpassed intelligence, style and convenience as the previous M680 series, but with 80% reduction in energy consumption.

The Securiton M680E is intelligent, with built-in door prop sensing allowing the magnet to de-energize the coil when the door is held open for extended periods. The Securiton M680EBD offers built-in smart voltage sensing, integrated patented BondSTAT, tamper sensor as well as door position status monitoring. The aesthetics and design finishes of the EcoMag are refined enough for the most discriminating designer openings. It also offers the fastest, easiest, most secure installation of any bracket mount maglock with an updated strike plate mounting template. The optional integrated request to exit (REX) provides optimum coverage for detecting an approaching person so the door unlocks for egress.

Features

Standard Features

- Strike plate mounting template provides the easiest install for out-swing doors
- LED Indicator shows the lock is secure, open, or has an incomplete bond
- Wire chamber anti-tamper switch
- Tamper Switch sends an alarm output if the cover is removed and is selectable to NO or NC
- Available integrated BondSTAT and Door Position Switch
- Autosensing dual voltage with microprocessor technology
- Adjustable automatic relock timer (0 to 30 seconds)
- Energy efficient, low power usage
- Size optimized for use with door closers
- MagnaCare® lifetime replacement, no-fault, no questions asked warranty

Optional Features

- **B** Integrated patented BondSTAT magnetic bond sensor
- **D** Integrated Door Position Switch (DPS)
- **X** Integrated passive infrared request to exit

281 Series Powerglide® Door Closer Standard Application

SARGENT®
ASSA ABLOY

The standard application of the 281 door closer is the most common providing high degree of door control and range of power adjustment. The closer is mounted on the pull side of the door with the arm mounted on the face of the frame. When the door opens, the arm passes over the top of the door.

281-0 Standard Application

281 Standard Application for:

- Interior Doors Opening In or Out
- Exterior Doors Opening In

Regular Duty Standard Arms

For use in moderate duty institutional applications

- Two piece sliding arm provides flexibility and ease of installation
- Double jointed arms allow flexibility in vertical mounting position
- Friction and fusible hold open arms available
- Mortised feet available for special frame applications

Heavy Duty Standard Arms

For use in abusive or high use installations

- Solid forged steel arms provide strength
- Friction hold open arm available
- Oil bronze bearings provide a high degree of wear resistance
- 2 piece rigid arms for ease of installation

281 Series Powerglide® Door Closer Parallel Arm Application

SARGENT®
ASSA ABLOY

Parallel Arm Application - The 281 closer is mounted on the push side of the door. As the door opens, the closer swings with the door and gives full headroom in the door opening. Other advantages are that the closer arm does not project into the room, the frame can be quite narrow and the door can be swung open much further than in Top Jamb Applications. However, the closing force is not as great.

281-P9 Regular Parallel Arm Application

Heavy Duty Parallel Arms

For use in high traffic and abusive environments

- Forged steel arm and cast iron foot bracket for strength and durability
- Oiled bronze bearings for superior wear resistance
- 2 piece rigid arms for ease of installation
- Friction and positive hold open arms available
- Use friction hold open arms for doors subject to moderate hold open use
- Dead stop and compression stop arms available
- Security non-hold open arms available

Non hold-open arms

- Two mounting positions for 120° and 180° maximum door openings

Stop arms

- 6 mounting positions allow stop from 85°-110°

Regular Duty Parallel Arms

- For use in moderate duty institutional applications
- Double jointed arm provides flexibility in the vertical mounting position of closer
- Flush frame arms available for use with Auxiliary Holders & Stops
- Flush frame, friction hold open arms available
- Friction and fusible link hold open arms available
- Use friction hold open arms for doors subject to moderate hold open use
- Use offset bracket arms with auxiliary holders and stops

Standard Mounting Position

- 120° Maximum door opening
- Holding range of friction and fusible hold open arms: 75° - 110°

Product Description & Features

- Heavy-duty
- Interior or exterior doors
- Doors may be single or double acting
- Non-handed
- Slide track design
- Recommended for high traffic, heavy abuse installations
- Heavy shock absorber spring provides 5 -7° compression before dead stop
- LS option omits spring for special applications
- Surface on/off knob on hold open models
- Stop, friction stay or hold open functions
- Complete screw packet for installation in wood and machine screws for door and frame.
- For security areas, Torx® screws available for exposed fasteners
- Standard architectural finishes
- Durable slider cam and shock block
- 110° maximum opening
- 1-3/4" minimum door thickness, for thicker doors, note thickness when ordering
- 1-3/16" square channel
- Stop function UL listed for fire door assemblies
- Hanging means other than standard butts or offset pivots require special templating and pricing. Consult factory

Overview

The SMART Pac III is an in-line power controller designed to protect and extend the life of HES electric strikes and other ASSA ABLOY electrified products. The built-in poly switch and zener diode protect the host system from possible reverse current surges, while a reduced voltage 'step down' extends the life of the electric strike by reducing operating temperature. The SMART Pac III can provide a DC output with an input ranging from 10.5 to 33 VDC or 10.5 to 30 RMS AC.

The SMART Pac III can also be used to troubleshoot installation problems. The SMART Pac III's built-in LED can be used as a simplified voltage meter that indicates the power supply voltage at the installation. In addition, the SMART Pac III has a two-position Slide Switch that matches the SMART Pac III output voltage to the operating voltage of the electric strike. Note: The input voltage must be in range of the voltage required by the electric strike.

1. **Connecting the SMART Pac III:** Connect the SMART Pac III to the wires coming from the access control panel as shown on Page 3, using either the 12V or 24V pigtail provided with the HES electric strike. If using other ASSA ABLOY electrified products, refer to the wiring schematic on Page 4.

2. **Using SMART Pac III to confirm correct input voltage:** Set the SMART Pac’s slide switch to the voltage of the power supply (see Page 3) and activate power. The behavior of the SMART Pac’s LED Status Indicator will communicate the following:

- Voltage input, and if it is within the input requirements listed on Page 3
- Correct position of the the SMART Pac’s slide switch for the voltage input

3. **Resolving Fault Codes:** A blinking or unlit LED indicates corrective action is needed.

- a. Using the LED STATUS INDICATOR TABLE below determine the appropriate corrective action.
- b. Remove power to the SMART Pac III and correct the error condition.
- c. Wait 10 seconds and re-power the unit. This will reset the LED indicator.

Warning: The slide switch configures the wiring to the electric strike. It does not control the SMART PAC III’s voltage output and will not prevent an overload condition if set improperly. The voltage rating of the electric strike must match the voltage output of the power supply (e.g.: Use a 24 Volt strike if you have a power supply rated at 24 Volts.)

If using an electric strike and/or additional devices in series with a single SMART PAC III, do not exceed a current rating of 750 MA at 25 C.

4. **Connecting the Electric Strike:** With no power supplied to the SMART Pac III, connect the electric strike. Verify the operation of the electric strike and a steady LED color when power is present.

LED STATUS INDICATOR TABLE

	LED COLOR	INPUT CONDITION	OUTPUT CONDITION	CORRECTIVE ACTION
1	Steady Green	10.5-21V*	15 VDC MAX STEPPING TO 9 VDC	NONE REQUIRED
2	Steady Yellow	21-33V*	30 VDC MAX STEPPING TO 18 VDC	NONE REQUIRED
3	Off or Blinking Green	TOO LOW (min. 10.5V)	~ 0	INCREASE VOLTAGE
4	Blinking Yellow	TOO HIGH (>33V)	~ 0	DECREASE VOLTAGE
5	Blinking 2 Yellow/2Green	ANY	WRONG SLIDE SWITCH POSITION	CHANGE SLIDE SWITCH POSITION
6	Blinking Yellow/Green	ANY	DOWNSTREAM SHORT	FIND AND REMOVE SHORT

*See input requirements on Page 3

NOTE: A self re-setting poly switch is built into the SMART Pac III to prevent damage to the electric strike in an over-current situation or downstream short. Normally, the SMART Pac III will detect over current situations and shut down the power output before the poly switch opens. If the poly switch trips there will be no voltage output and no LED status.

12 VOLT CONFIGURATION-Fail Secure or Fail Safe

INPUT REQUIREMENTS:

10.5-21 VDC OR 10.5-15.5 V RMS AC POWER

OUTPUT:

15 VDC MAX

Voltage will drop to 9 VDC after two seconds

24 VOLT CONFIGURATION-Fail Secure or Fail Safe

INPUT REQUIREMENTS:

21-33 VDC OR 21-30 V RMS AC POWER

OUTPUT:

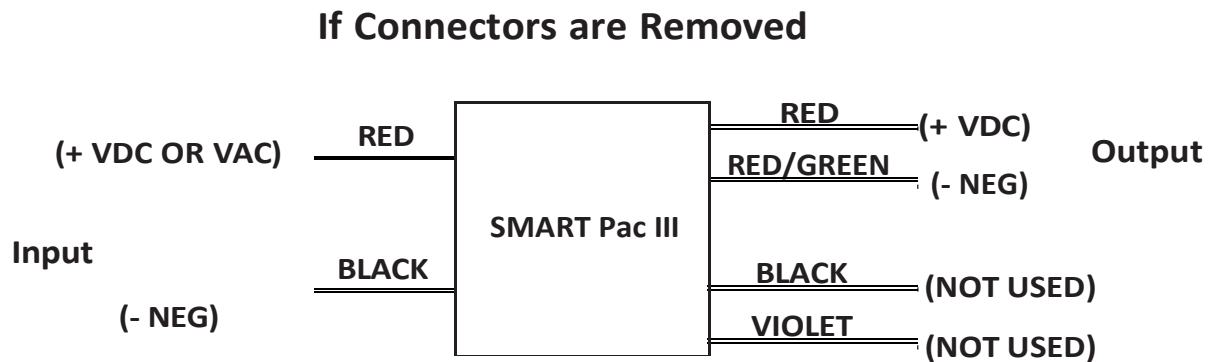

30 VDC MAX

Voltage will drop to 18 VDC after two seconds

If the SMART Pac III is being used with ASSA ABLOY electrified products check to make sure the electrified product or products do not have a current rating exceeding 750 mA at 25 degrees C. Remove the SMART Pac III molex connectors and connect wires as illustrated in the diagram below.

Note: After modifying, please cap the Black and Violet wires independently to prevent electrical shorting within the frame. Also, verify device is within the current limitations specified on page 2.

HA9

Full Featured – Low Energy Operator

The Record HA9 is an extremely quiet low energy door operator with a low-profile header that comes jam-packed with standard features.

Its electro mechanical design offers simple dependable operation. The cast alloy arms and door stop have been engineered to resist abusive situations making it perfect for moderate to high-traffic locations including schools & universities, hospitals, retail stores, airports, convention centers, casinos, industrial buildings and offices.

The HA9 is compatible with most safety and activation devices, and can be integrated with building access & security systems. Some of the built-in safety features include lock kick for positive latch during fire/safety events, stop on stall, reverse on obstruction, and sensor monitoring.

Available in push or pull, clear or dark bronze for single, pair or dual egress configurations.

Complies with the following standards.

ANSI/BHMA A156.19, UL325/UL10C.

Quality

The ML2000 Series is a Grade 1 mortise lock designed to meet the rigors of high-traffic commercial, institutional, industrial and government applications. Constructed of heavy-gauge steel, the lockbody features our patented Quick Reversible latchbolt, and a 1" stainless steel deadbolt. A wide variety of trim designs and functions and a 10-year warranty lend to the ML2000's versatility and reliability, making it the ideal choice for use in offices, schools, hospitals, hotels and other high-use applications.

Security

Further discourage intrusion and abuse with the ML2000VR (Vandal Resistant) series mortise lock. This lock features vandal-resistant stainless steel escutcheons with tapered edges and Torx® pin tamper resistant screws. When matched with Corbin Russwin patented high-security cylinders, any door can become a formidable barrier to intruders.

Flexible

The ML2000 Series has a multi-function capability, allowing 12 functions to be configured from one lockbody. The ML2054 entrance function (ANSI F04) uses a universal lockbody with the ability to reconfigure into other functions without disassembling the lock case.

Aesthetics

Complement any application with the full range of trim designs and finishes offered with ML2000 Series. From stainless steel security trims to bright brass Vineyard™ levers, design continuum can be achieved without forfeiting aesthetics. For additional information regarding designer trim, see the Corbin Russwin Vineyard™ Collection and Muséo® Collection catalogs.

Key Advantages

- Patented Quick Reversible feature enables reversal of hands without disassembling the lock case (Patent pending and/or patent www.assaabloydss.com/patents)
- Security trims provide a vandal-resistant barrier
- Can be used with new or existing Corbin Russwin key systems. Also accepts cylinders of most other manufacturers.
- Provides life safety and security in a single door prep, saving the additional cost of a deadlock
- Thru-bolted trim designs for proper alignment and increased security
- Multi-function lockbody
- Status indicator options provide peace of mind on the locked/unlocked status of a door

ML2000 Series

Features

Handing

Handed; quick reversible. The lockset can be re-handed without disassembling the lock case; see page 87.

Door Thickness

1-3/4" (44mm) standard.

Optional door thicknesses available; see Quick Codes, page 81.

Backset

2-3/4" (70mm).

Lockcase

Heavy-gauge steel, 5-7/8" (149mm) x 4" (102mm) x 15/16" (24mm).

Optional: non-ferrous lockcase for corrosion resistance; see Quick Codes, page 81.

Front

Heavy-gauge steel, 8" (203mm) x 1-1/4" (32mm) x -3/32" (2mm). Accommodates flat doors and doors beveled 1/8" (3mm) in 2" (51mm). Furnished 1-1/16" (27mm), optional D138, wide for 1-3/8" (35mm) doors.

Armored Front

Wrought brass, bronze or stainless steel attached by machine screws to lockcase front. ML2000VR utilizes security Torx® screws.

Latchbolt

2-piece mechanical with anti-friction insert, 5/8" (16mm) x 1" (25mm) x 3/4" (19mm) throw.

Auxiliary Latchbolt

9/16" (14mm) effective throw and 3/8" (10mm) effective auxiliary latch deadlocking.

Deadbolt

One-piece stainless steel, 19/32" (15mm) x 1-1/4" (32mm) x 1" (25mm) throw.

Indicators

Status indicators available in sectional or escutcheon trim with many options providing clarity of the locked/unlocked status of a door.

Hub

- Knob: stainless steel, 9/32" (7mm) x 9/32" (7mm).
- Lever: steel, 5/16" (8mm). (Including )

Spacing

C. to c. knob/lever to cylinder: 3-5/8" (92mm).

C. to c. knob/lever to thumbturn: 2-7/16" (62mm).

Strike

Wrought brass, bronze or stainless steel, ANSI straight lip standard, 4-7/8" (124mm) x 1-1/4" (32mm) x 1-1/8" (29mm) lip to center. Optional strikes, lip lengths and ANSI wrought strike box available; see Quick Codes, page 81.

Cylinder

Brass, 6-pin, L4 keyway, 0-bitted standard. Optional cylinders available; see Quick Codes, page 73.

Keys

Two nickel silver standard.

Monitor Options - ML2000 and ML20900 ECL Only

M91 - Latchbolt Monitor

Latchbolt monitoring is a SPDT switch which monitors the full extension of the main latch. Note: See page 83 for available functions.

M92 - Request to Exit Monitor

Request to Exit monitoring is a SPDT switch which monitors the activation of the trim. (Both levers activate switch) Note: See page 83 for available functions.

M105 - Security Monitor

Security Monitor is two switches in series that monitors lock status (locked or unlocked) and Auxiliary Latch position. Note: Monitoring options may only be ordered together as follows: M91xM92, M92xM105. See page 83 for available functions.

Monitor Options – ML20600 NAC only

Internal End-of-Line Monitoring

Monitors the line from the access control panel to the lock, eliminating the risk of undetected tampering or damage.

PHR - Deadbolt Privacy Function

Engaging deadbolt disables remote access control unlocking (keypad or card reader) or scheduled unlock.

Overview

ML20900 ECL Series

ML20900 ECL Series Electrified Mortise Lockset

Simplicity

Combine simplicity and access control with the Corbin Russwin ML20900 ECL series electrically controlled mortise lock. Utilizing the proven ML2000 Series mortise lockset with the patented quick reversible latchbolt, the ML20900 series provides remote locking and unlocking. The electrified lock can be installed in a standard mortise prep with slight modification by door manufacturer. The ML20900 ECL is ideal for use where increased security is necessary at all times, such as tenant space, pharmacies, computer rooms, and high security areas.

Security

In applications where increased security is required, look no further than the ML2000VR Vandal Resistant Trim. This cast stainless steel trim features tapered edges, double through bolts, torx-pin tamper resistant screws and the lever remains attached to the escutcheon when the spindle is broken.

Aesthetics

Access control doesn't mean a loss of visual appeal. The Vineyard™ Collection and the Muséo® Collection feature beautifully designed levers, perfect for high-profile applications where pleasing aesthetics is a must.

Additional Features

- Mechanical key override
- Patented Quick Reversible latchbolt (Patent pending and/or patent www.assaabloydss.com/patents.)

Typical Application

Featuring EcoFlex® Technology:

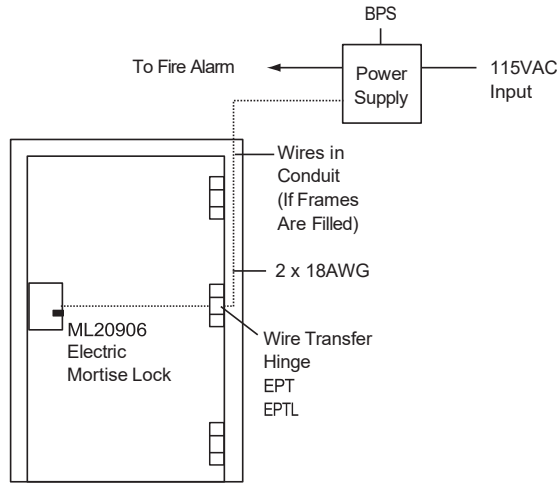

- Reduces energy consumption up to 96%, as certified by GreenCircle
 - Lower operating costs
 - Assists with load reduction in optimizing energy performance credit in LEED
 - Reduces number of power supplies required
- Field configurable to fail-safe or fail-secure
- Operates from 12-24VDC, offering greater flexibility in system design
- Innovative actuator design provides superior reliability
 - Higher performance and reduced maintenance
 - Ability to have longer cable runs without negatively impacting lock function
 - Reduces risk of voltage drops and eliminates inductive kickback
 - Lower total cost of ownership

Note: EcoFlex Technology is not available with master ring cylinders. Solenoid provided.

Typical System Components (For Reference Only)

ML20900 ECL Series

Tower Stairwell

Operation:

Free egress at all times. Door is locked at all times preventing entry from the stairwell to a floor. Fire alarm activation will allow re-entry from the stairwell to the floor. Power failure will allow re-entry from the stairwell to the floor.

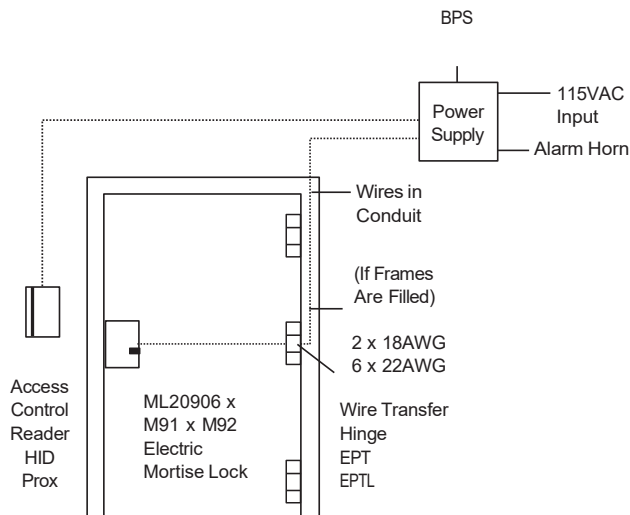

Access Control on Employee Entrance

Operation:

Free egress at all times. Door is locked at all times preventing unauthorized entry. Authorized entry is permitted by presenting a valid user card.

Controlled Entry With Alarm

Operation:

Free egress at all times. User exits through the door which triggers the M92 switch which shunts the alarm. Door is locked at all times preventing unauthorized entry. Authorized entry is permitted by presenting a valid user card. Forced entry will trigger M91 switch and activate alarm. Alarm is deactivated by a valid user card.

nexTouch®

Keypad Locks

ASSA ABLOY is transitioning the Yale Commercial brand to ACCENTRA. This affects only the brand name; the products and product numbers will remain unchanged. Prior to May 20, 2024, products may be shipped either as Yale Commercial brand or ACCENTRA brand. Products shipping after May 20, 2024, will be branded ACCENTRA.

The fully modular design of ASSA ABLOY ACCENTRA™ nexTouch® allows users to easily upgrade to more advanced security technologies as their requirements grow and change.

Standalone Keypad

Great for restrooms, offices, storage closets and more, nexTouch® as a standalone keypad is easy to install, program, and manage access with PIN codes.

Data-on-Card

In new construction or retrofit projects for multi-family facilities, the data-on-card functionality of nexTouch® pairs with ASSA ABLOY ACCENTRA Accentra software for use with mobile credentials, key cards or fobs.

FEATURES & BENEFITS

Feature	Benefit
Choice of capacitive touchscreen or tactile pushbutton keypad	Touchscreen responds to human touch, enabling convenient entrance or access to programming menu. Pushbutton keypad option also available for more tactile requirements, such as ADA compliance.
Keyless entry and management	Reduces complexity of key system management
PIN code access	Installations are able to be programmed with up to 500 unique PIN codes and a master code for access to programming.
Modular technology	Allows for upgrade to more advanced security technologies with Data-on-Card as requirements change and grow.
Works with cloud-based management software	Single system enables use from anywhere with Internet access from a range of devices, including your computer, smartphone or tablet.
Audit trail	Lifetime audit trail stored within the software to know exactly who has accessed the lock when.
Voice-guided programming in 3 languages	Voice-guided prompts make updates straightforward and effortless in English, Spanish or French.
Three (3) volume modes	Playback can be set for normal, low or silent.
Privacy feature with Door Position Sensor	By holding the interior lock button down for 1.5 seconds, the exterior keypad is temporarily disabled ensuring complete privacy and no additional entry.
Weather resistant gasket seal	Lock is operational even in outdoor settings, in temperatures ranging from -40°F to 140°F (-40°C to 60°C) at 95% relative humidity.
Low battery indicator	Blinking designation signals internal 4 AA alkaline batteries are low.
9V battery power backup feature	With the touch of a 9V battery to the designated area on the front of the lock, your nexTouch® can be powered up for one-time entry.
Hardwire power capable	Can be powered externally using remote 9VDC power supply and plug-in wall transformer.
Keypad lockout feature	Deters tampering by disabling the keypad for a default of 180 seconds after five (5) successive failed attempts.

ACCENTRA nexTouch® locksets are available with a variety of strike options. All strikes are located on the same vertical and horizontal center lines as the latchbolt. Some strikes are available in a variety of lip lengths to accommodate varying thickness of doors and frames. To determine the proper length of the lip, measure from the center line of the strike to the edge of the jamb and add 1/4" (6mm). All strikes are reversible.

Model No. 497 ANSI Strike (Standard)
For door and frames with ANSI/BHMA A156.115 preparations. 1-1/4" supplied standard. 1-1/8", 1-1/2", and 1-3/4" lip lengths available by special order.

Model No. 371 T-Strike (Optional)
1-1/4" curved lip supplied standard. 1", 1-1/2", 1-3/4", and 2" curved lip lengths available by special order. Wrought strike box supplied.

Model No. 202 Strike Box for ANSI Strike (Optional)
Specify 497 x 202.

STRIKES

Sectional Mortise

ACCENTRA nexTouch® Keypad Sectional Mortise Locks come standard with a 2815 Curved Lip Strike with a 1-1/4" (32mm) lip length. The strike supplied will accommodate the locking function, i.e. latchbolt and/or deadbolt, and can be installed on doors 1-3/4" (44mm) thick. These strikes are non-handed.

Material: Brass, Bronze, Stainless Steel.

Longer/Shorter Lip Lengths: Mortise lock strikes are mounted 3/8" above the center line of the lock. To determine the proper length of lip use the following formula:

1/2 of the door thickness, plus 1/16" inset, plus trim thickness, plus 1/8" for flat lip strike OR 1/4" for curved lip strike. Select the nearest available length.

Profile Series v.G1.5

3267 Remote Power

- Provides a filtered and regulated 9 VDC remote power for Profile Series v.G1.5 locks
- Each unit can supply power to two v.G1.5 or LK products
- Optional 12 VDC Gel Cell battery allows for continuous operation in the event of a power failure. (Strongly recommended for applications without cylinder over-ride to prevent lock-out)
- Requires manufactured door with ElectroLynx or raceway through the door for hard-wiring*

Reference template list below for correct preparation of non-ElectroLynx doors.

4540 – Bored Lock
4541 – Mortise Lock
4542 – Rim and Mortise Exits

Includes:

- Plug-In Wall Transformer (52-0255) and (52-0258) 12' (3.6m) of shielded wire for connection between power transfer and power supply. (Maximum length of 50' (15.2m) recommended)

* Recommended for new opening. Retrofit application may require surface mounted wire mold and transfer loop by others.

52-2551 RF Fob

RF technology offers stand-alone access control enhancement by allowing the user to remotely control the lock by means of a hand-held transmitter (RF Fob).

The Profile Lock is easily programmed for three primary RF actuation modes: Passage, Standard or Panic. RF Technology is a means of operating the lock in addition to by direct keypad code entry or proximity credential presentation.

NOTE: RF Fob sold separately

XMS Exit Motion Sensor

Versatile motion detection for hands-free exit request

a door and releases its lock.

Versatile mounting options and an easily adjustable infrared beam pattern provide optimal coverage of the egress area for smooth, hands-free lock release and exit.

Safety Note: ASSA ABLOY Electronic Security Hardware recommends that an emergency exit button, such as the EEB, be used in conjunction with the XMS to meet applicable building codes and specific life safety issues.

Single Pole – Single Throw (SPST)

Switches that have one input and one output (NO or NC) and turn on or off in response to the switch action

Single Pole - Double Throw (SPDT)

Switches with one input and two outputs. When the switch operation occurs, the connection shifts from output A to output B

Double Pole - Single Throw (DPST)

Two SPST switches that operate in tandem using one switch operation so that two outputs turn on or off simultaneously in reaction to the switch operation

Double Pole – Double Throw (DPDT)

Two SPDT switches that operate in tandem using one switch operation so that each connection shifts simultaneously from its primary output to its secondary output

Momentary Switch

A momentary switch changes state during activation and reverts to its original state upon deactivation. A doorbell is a common example of a momentary switch. A timer can be used to extend the effect of the switch operation for a specific amount of time.

Alternate Switch

An alternate switch changes state upon activation and does not change back until reactivated. A light switch is a common example of an alternate switch. Alternate switches are also called maintained or latching switches. Normally Open Contacts (NO)

A normally open contact provides an open circuit where no current is flowing in its usual state.

Wired in Parallel for Fail Secure type electric locks (i.e. Electric strike). Activating any switch will apply power, releasing the lock.

Normally Closed Contacts (NC)

A normally closed contact provides a closed circuit where current is flowing in its usual state.

Wired in Series for fail safe type electric locks (i.e. Securitron Magnalocks). Activating any switch will break power, releasing the lock.

Securitron AQD & AQS Series

Dual & single voltage switching power supplies

Securitron AQD Series dual voltage and AQS Series single voltage switching power supplies are both supervised units with a battery charger designed to power magnetic locks, electric strikes, card readers, sensors, access control boards and other devices in access control systems. The Securitron AQD and AQS Series can also be used to power DC cameras and other DC locking equipment. These units provide field selectable 12 or 24 VDC with up to 16 independently controlled power limited outputs.

Features

Standard Features

- AQD Series is dual voltage 12 or 24 VDC field selectable continuous output
- AQS Series is single fixed voltage 12 or 24 VDC continuous output
- Tolerates brownout or overvoltage input $\pm 15\%$ of nominal voltage
- Thermal shutdown protection with auto restart
- Circuit breaker protects against overcurrent and reverse battery faults (*batteries sold separately*)
- Dedicated battery charging circuit prevents over voltage on locking devices (*except for AQD1*)
- Expandable up to 16 outputs in the standard enclosure
- Outputs are Class 2 limited when used with PTC Polyswitch output distribution boards
- Available with a single relay fire trigger or individually fire trigger relayed outputs
- Low noise design provides better than linear performance
- Mix and match configuration allows for UL compliance even when used in other UL Listed enclosures
- MagnaCare® lifetime replacement, no-fault, no questions asked warranty

Concealed Electrical Power Transfer

Beautifully Crafted, Compact, Secure Power Transfer

The heavy-duty, tamper-resistant Concealed Electrical Power Transfer (CEPT) securely transfers power and data from the hinge side of the frame to electrified hardware on the door. The unit is discreetly concealed between the frame and door when the door is closed. Available in three multi-wire configurations and four finishes, the CEPT complements any architectural setting.

Double Swing Hinge with Emergency Release Stop

Designed for safety and reliability in healthcare environments

The Double Swing Hinge with Emergency Release Stop is an innovative healthcare solution that permits quick door opening in an emergency situation. A double swing continuous hinge is combined with an emergency release stop to provide additional safety features that are easy to use and help minimize risk.

ASSA ABLOY offers two styles of double swing hinges and two styles of emergency release stops. The Markar Double Swing Hinge features a pin and barrel style hinge and the Pemko Double Swing Hinge features a gear style hinge. Both double swing hinge styles have a unique 100° swing that allows the door to swing in either direction.

The two models of the Pemko Emergency Release Stop feature either a special flush bolt or a multipoint latch. Both models provide the functionality to release the stop in an emergency situation, allowing the door to be opened in the opposite direction. The stops are used on the strike edge of the door and come standard with hospital tip to complete the solution.

The Double Swing Hinge and Emergency Release Stop are accepted by the New York State Office of Mental Health (OMH) for use in high risk areas.

Features	Benefits
Double-swing design opens 100°	Opens wide in either direction
Continuous hinge	Proper alignment and weight distribution extend the life of the door
Emergency release	Quickly releases stop in an emergency situation
Hospital tip	Provides a safer environment for hospitals and healthcare facilities
CMS Compliant	Eliminating additional ligature points ensures compliance for reimbursement through CMS (Centers for Medicare and Medicaid Services)

Applications:

- Healthcare Facilities
- Behavioral Health
- Assisted Living
- Food Service
- Hospitals

ERS Notches

ERS: NPXXL and NBP
ERSMP: NBP only

The ERS notches are designed to clear a variety of door hardware trim with a 2 ³/₄" backset. For example the NBP notch is large enough to clear most cylindrical locking levers with rose trim, including the Corbin Russwin Behavioral Health Series Lever (BLSS).

ERSMP - Emergency Release Stop MultiPoint Frame Preparation

1. Using a 1/8" drill bit, drill pilot holes at the six location laid out from step 1. As shown in the Drill Size diagram below, enlarge each hole using a 3/8" drill bit. Then enlarge the two center holes, using a 3/4" drill bit. Each of the two preps should resemble the two preps shown in the Drill Size diagram.

ERS-TS Technical Specification Drawing

If using a cased open frame, you will require an extended lip strike due to the

placement of the door strike and the ERS installed on the frame on the corridor side.

NOTE: Rebate only on the lock side of the door for using standard lip strike.

As an option, you can use a single rabbet on the lock side only (you still need

cased open on top and hinge side) so that you can use a standard strike in lieu of an extended lip strike. (notice the door will not hit the stop like a typical single rabbet jamb).

Care And Maintenance

CLEANING: Pemko's aluminum products and solid gasket products can be cleaned with a mild soap with warm water. A clean non-abrasive cloth should be used to clean the surface of these products. For removing grease, sealant, or other minimal adhesives a mild solvent such as mineral spirits may be used; then clean with mild soap mixed with warm water. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

For sponge gasket and weatherstrip products, wipe with a damp cloth. Do not use mineral spirits or other chemical as this may cause the plastic to "melt" or deteriorate. To dry, allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

The use of strong solvents or cleaner concentrations may cause damage to the finish surface and isn't recommended.

MAINTENANCE: Pemko products are generally low-maintenance and require nothing more than general cleaning. Should anything outside of "general cleaning" arise, please consult Pemko Customer Service. If you have any questions, or if you have a situation outside this scope, please contact Pemko Customer Service.
