Describe the manufacturing processes (elaborate to provide as much detail as possible)	The manufacturing and assembly process for supplying a plastic mold bucket with cleaning items begins with injection molding the plastic bucket, followed by sourcing and staging of all individual components—such as the sponge, mop/broom handle, bristle broom head, smaller brooms and brushes, gloves (both reusable and disposable), cleaning solution, tarp or trash bag, and mop head. Each item is quality-checked and organized in a standardized packing sequence to ensure efficient space usage and safe transport. The complete set is then inserted into the bucket, sealed, labeled, and prepared for bulk packaging and distribution.
