List required materials needed to make the product, including materials of product components	Steel-backed composite material comprised of carbon steel, bronze, PTFE
Are there applicable certification requirements?	No
Are there applicable regulations?	No
Are there any other standards, requirements, etc.?	Yes
Details	BABA - Certificate of Conformity of 100% US materials and US manufacturing
Additional Technical Comments	We work with a variety of Build America Buy America projects through multiple agencies as we are an assembly (gear box/actuator/valve) provider to many industries. Sometimes our BABA requirement is that only 55% of the assembly must be manufactured in the United States. Other times our requirement is that 100% of the assembly must be made out of materials manufactured in the United States. This submission is managing the latter case.
